

FACT: Almost 100% of today's LIMESCALE solutions underperform!

AQUABION® – A REVOLUTIONARY NEW DEFENSE AGAINST - LIMESCALE USING ADVANCED GERMAN ENGINEERING

SCIENTIFICALLY PROVEN: Blocked Pipes. Luke-Warm Showers. White Limescale Staining. High-Energy Bills? AQUABION Kills LIMESCALE BUILD-UP

Many years ago I read in a local paper the problems Limescale was causing in homes. I could relate to that because I had been searching for a solution to my own blocked pipes, damaged central heating and endless white lime staining on taps and shower doors at home. Frankly not only had it cost me a small fortune I didn't expect to spend but research revealed over **THREE BILLION POUNDS** per year are lost and wasted to LIMESCALE DAMAGE!

in my kitchen to store the large unit and I also had to buy large bags of salt in bulk to get a decent price. The other thing after reading a lot of online reviews it seemed a lot of salt based softeners were not only cheap (or very expensive) but under performed. Even worse – It meant I would have to avoid drinking or getting water into my mouth whilst having a shower due to the very salty taste now in the water (of course the salt water is safe to drink but – SALTY!).

USED BY:

Here's how good the AQUABION® is; The Ministry of Defense, large housing associations and even the mighty McDonald's have them installed in most of their locations. They love them because there is NO salt taste in the water, no extra cost buying tons of salt and of course they only get replaced every 7 years time. My advice ... Just get one fitted – they work!

AREAS AFFECTED BY LIMESCALE

This area is heavily affected – YOU are affected. (This is what Limescale looks like below) The Plumber finally at my home to try and source the problem of my heating. It was a strange case, one side of a pipe was hot and the other end of the same pipe was cold (and my shower had lost all pressure)? The plumber finally decided the best thing to do was change the pipe. After he cut through it not only was he shocked I couldn't believe my own eyes. The pipe hole was almost closed due to a huge build up of **LIMESCALE** and this stuff was hard as rock! Then more bad news; the plumber asked me if I was prepared for my boiler to shut down and the possibility of other pipes being replaced? Of course I said I hadn't really give it any thought but after this it was going to clearly be a problem at some stage.

REMOVING LIMESCALE:

The plumber said, 'Have you ever tried any kind of water conditioner or in plain old English... **LIMESCALE PREVENTION?** I had read about salt-based softeners. What put me off salt-based water softeners was I had to give up a cupboard

AQUABION® SOLUTION:

The plumber listened and then replied, 'have you heard of the AQUABION® water conditioner?' I hadn't I replied. 'I have been installing them for a while now and honestly they are hard to beat. The salt solution is cheap but you know what you get when you pay cheap! The AQUABION® is very different to anything I have used over the past 20 years and it's proven to work.

7-YEAR PROMISE:

Not only is it designed to work for seven years it has a lot of benefits compared to the salt conditioners. For instance it simply gets plumbed in to your current pipework so no cupboard space is taken up, no bags of salt are bought and there's no horrible tasting water in the shower and it lasts a huge 7 years. The other thing worth knowing is that the AquaBion eliminates LIMESCALE in just 7 days! I can order one for you and even fit it if you like? The daily cost works out at around 11p a day! It's a dead simple install that'll take me from 30 minutes to an hour. And after install you'll have almost perfect water in just 7 days so you have no worry about surprise breakdowns due to LIMESCALE (or those white horrible stains on your taps).

LABORATORY TESTED:

This is pure German engineering at it's best and Germans being Germans like to test everything to perfection so you have nothing to worry about – it really has been tested and approved by scientists at the world famous LANEXX Laboratories in Germany.

LIMESCALE PROBLEM REMOVED:

Would you like to know how to have an AQUABION® fitted into your home? Please simply ask the supplier at the desk right now. Not only will he be able to answer all of your questions he'll be able to order an AQUABION® unit for you today!

HERE'S WHY YOU SHOULD HAVE YOUR OWN AQUABION® INSTALLED:

- Scientifically Proven
- German Engineering
 - 11p Per Day
 - Last 7 Years
 - 5 Year Replacement Guarantee
 - Water Drinkable
 - Better for Skin
 - Safe on Babies
 - Latest Laboratory Technology
 - No Storage or Space Required
 - Easy Fit
 - Perfectly Safe
 - Limescale FREE in 7-Days
 - Saves You Money
 - Cleaner Home
 - Improves Heating & Energy Performance
 - Reduce Heating Costs
 - Saves Boilers from Certain Failure
 - 98.3% Users Recommend

THE SCIENTIFIC STUFF ON HOW IT ALL WORKS!

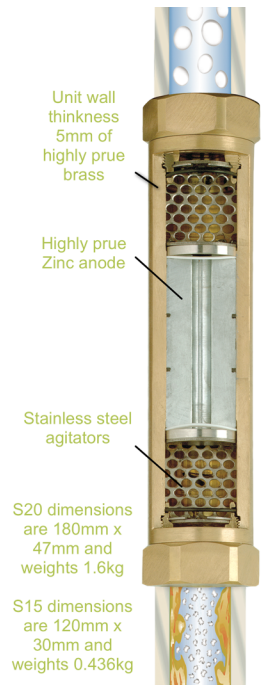

How does the unique Aquabion method work?

The Aquabion water conditioner system is based on a proven patented technology, with an international track record of successful installations in a wide range of domestic and industrial situations. The system uses zinc sacrificial anodes that release zinc ions which react with calcium to form aragonite. Thus preventing limescale build up and forming a thin protective layer. There is no other product on the market which can use this technology and there have been many independent tests which confirm that Aquabion is safe and 95%-98% effective. Water treated by the Aquabion water conditioner is perfectly drinkable and still includes all the essential minerals that occur naturally.

The Aquabion has a highly pure, zinc sacrificial anode. This combined with Turbulence bodies creates currents leading to a self-cleaning effect of the anode. By dosing with the electrolytic method when fundamentally change the structure of the limescale. Below you will see the image before Zinc dosing and after Zinc dosing as found by J MacAdam for her Ph.D. Thesis.

Aragonite Crystals under 2000x
MacAdam, J (2005). Calcium Carbonate Scale Formation and Control. Ph.D. Thesis. Cranfield University: U.K.

Unit wall thickness 5mm of highly pure brass

Highly pure Zinc anode

Stainless steel agitators

S20 dimensions are 180mm x 47mm and weights 1.6kg

S15 dimensions are 120mm x 30mm and weights 0.436kg

Its really simple.

- ✓ Proven, patented, laboratory and science supported german engineering
- ✓ Zinc sacrificial anodes release Zinc ions which react with calcium and that in turns forms aragonite.
- ✓ This prevents limescale build up. It is safe and up to 98% effective!

We asked current users what they thought! 98.3% of AquaBion Users WOULD Recommend It!

Can be self-installed or a home install by your plumber. 30-90 minutes on average.

100% Satisfaction Guaranteed.
5 Year Return and Replace Policy.

THE FINEST GERMAN ENGINEERING CREATES A DREAM SOLUTION FOR WATER SOFTENING!

SUMMARY

- The AQUABION® system prevents aggressive lime deposits (aragonite instead of calcite).
- The AQUABION® system prevents the formation of new limescale and further growth of old accumulations.
- Existing limescale is also reduced by the use of the AQUABION® system.
- The AQUABION® system is approved for drinking water use, certified by the German GS association and complies with German KTW recommendations. The system is environmentally acceptable and does not change drinking water quality.
- The AQUABION® system does not result in any ongoing operating costs during its service life.
