STUDIO
COLLECTION

A vertical, rectangular decorative radiator with a textured, orange-brown surface is mounted on a rustic brick wall. The room features a wooden floor, a wooden chest of drawers with brass handles, a white bust of a man's head, and a large green plant. A red banner is overlaid at the bottom of the image.

ZEHNDER ARCHIBALD

You are what you Heat

The Manufacturers Association of Radiators and Convectors (MARC), is committed to product satisfaction and consumer assurance and as members Zehnder pledge to raise standards and compliance, through a series of initiatives the first one being a targeted consumer campaign.

Launched in July 2020, the 'You are what you Heat' campaign explains the importance of having, *CE markings on all radiators. This ensures heating systems and homes are fit and healthy and consumers are receiving high-quality and fully tested & approved products.

What will happen if I end up with a radiator that is "under sized" due to incorrectly published outputs?

- 1 It will not adequately heat the space it was purchased to do
- 2 In order for you to be warm enough, it will be necessary to run the boiler at higher temperatures than would have been necessary
- 3 You will burn more fuel and in turn create more CO2 emissions
- 4 Burning more fuel will increase your heating costs
- 5 This may affect the life cycle of the boiler or heat source

By purchasing a Zehnder radiator you do not have to worry about any of the above.

All of our radiators are independently tested and conform to the highest of standards. As proud members of MARC, Zehnder have and will continue to play an integral part in delivering high-quality heating products with true heat outputs.

To find out more visit: <https://www.zehnder.co.uk/company/news/marc-you-are-what-you-heat>

Affiliated companies

Zehnder are proud to be members of The Manufacturer's Association of Radiators and Convectors, an organisation established to focus on creating & maintaining the highest industry practices and standards.

Professional Bathroom CAD

Zehnder products are included in the inno+ professional bathroom CAD package meaning you can see your radiator before your bathroom is installed.

Zehnder products are included in the Virtual Worlds design software meaning you can see how your radiator will look in your bathroom before it is installed.

Zehnder products are available in the eq software package, making it easy for showrooms to add these to an overall bathroom order.

Eco Design Regulations for electric heating

RIGHTLINE (UE) 2015/1188

Since 1st January 2018, all electric local space heaters manufactured for sale in the EU must comply with a minimum efficiency standard under Lot 20 of the Energy Efficiency Directive. This was one of the biggest changes the electric heating industry has experienced in decades.

Zehnder products that fall within the scope of the Eco Design Directive offer high quality performance with efficient controls to help reduce unnecessary energy wastage and running costs including;

- Low energy consumption when on stand-by (<0.5 watts)
- Programmable operation (weekly)
- Open window detection

Accreditations correct at date of print July 2022

World of Colours

New for 2022 – Zehnder are pleased to announce a brand-new World of Colours bringing the latest on trend colours and finishes to your decorative radiator whilst keeping the popular, timeless classics.

Made up of the following 5 new colour worlds and divided into Warm and Cool Colours, Zehnder have worked closely with leading interiors and colour experts to define this new trend driven colour palette.

The Sanctuary

The home as a place of rest, relaxation and retreat

The home is a place of relaxation and tranquillity. Rough surfaces, brushed finishes, mixed glazes and natural materials create sanctuaries. Natural off-white, light brown and grey tones are the key to a cosy environment to relax in. Brushed metals such as brass mixed with wood create a modern contrast. Round shapes and soft textures soften any feeling of austerity.

The Mystical Home

A private place for personal rituals and wellness

Rough, natural surfaces contrast with refined designs. Rough concrete textures mixed with polished stone surfaces create a multi-sensory experience. Black and dark grey shades, graphite and taupe are the key to a mystical home. The monochrome rooms are accentuated by dark blue tones and brushed metal. The muted colour palette is made for a tranquil space for personal rituals and wellness.

Mother Earth

Terracotta as a symbol for a warm and earthy look

Terracotta helps to create an earthy and warm look, both as a material and as a colour. The highly pigmented quality of terracotta and the deeply saturated but sun-faded solid colours create a natural and sophisticated look. Shades like cotton white, ochre, brick red and brown are combined to create an earthy colour palette. Terracotta is symbolic of the earth we live on and our strong desire to protect it.

Mono Material Concrete

The continuity of space – raw, seamless, expressive

The use of a single material creates a seamless, uniform look and a quiet space – free from visual noise. Raw concrete flows from the interior to the exterior, giving continuity to the space. Eccentric orange and natural brown tones create a modern contrast. Home accessories in brushed metal are ideally combined.

Neo Green

Reflections on our desire for a natural environment

Green tones create a balance with our desire for more nature in our lives. Walls and floors, but also textiles and décor appear in shades of green. Soft, delicate mint or petrol-coloured graphite reflect our desire for a natural environment. Nude, light brown and grey tones create harmony and calm.

Zehnder **selection**

		Product		Product	
	<p>Alura</p> <p>The Alura, is a fast response electric aluminum radiator with a high heat output despite its compact size. It's lightweight and easy to install, and the straightforward digital controls make it easy and economical to use.</p> <p></p>	18	<p>Blok</p> <p>The Blok radiator complements the clean lines of contemporary bathrooms and kitchens. Compact and with a good heat output, this energy efficient aluminium radiator is suitable for both large and small spaces.</p> <p>  </p>	30	
	<p>Ax Spa</p> <p>With its single or double tube options, the unique Ax Spa can meet all bathroom-heating requirements. It is also available as an oil-filled electric radiator. Smaller sizes ideal for fitting under bathroom windows, or within cloakrooms and en-suites.</p> <p>    </p>	20	<p>Buckingham</p> <p>The Buckingham is a transitional wall-mounted design, as suitable for modern bathrooms as it is traditional rooms. It is made from chromed steel, and can be used on both central heating and hot water systems, further adding to its flexibility.</p> <p>   </p>	32	
	<p>Ax Spa Chrome & Electric</p> <p>The Ax Spa is available in modern chrome as well as a range of contemporary colours. The electric version offers a flexible bathroom heating solution.</p> <p>    </p>	22	<p>Charleston</p> <p>The Charleston multi-column is equally at home in modern and traditional environments and is available in a wide range of stocked horizontal and vertical sizes. It can also be Made to Measure, angled and curved.</p> <p>  </p>	34	
	<p>Aluminium Blitz Super</p> <p>Aluminium radiators give a fast response and comfortable heat with high thermal efficiency. Energy saving and easy to handle and resistant to corrosion, the Blitz Super is a modern radiator in every sense.</p> <p></p>	24	<p>Charleston Bar</p> <p>The popular Charleston Bar multi-column with chrome towel bar combines warmth and practicality. Perfect for kitchens and bathrooms. Small sizes ideal for fitting within cloakrooms and en-suites.</p> <p> </p>	42	
	<p>Aluminium Garda S90</p> <p>Space-saving, economical and efficient, the Aluminium Garda radiator is fast to respond and easy to handle, plus it is also available with an optional towel bar making it suitable for living, kitchen and bathroom spaces.</p> <p></p>	26	<p>Charleston Electric & Plinth</p> <p>The Charleston is an electric, oil-filled multi-column radiator available in six sizes that would suit a variety of rooms, especially loft conversions. The complementary Charleston Plinth low level model is perfectly suited to conservatories for use in front of windows.</p> <p> </p>	44	
	<p>Balmoral</p> <p>The Balmoral is the perfect radiator for large, vintage bathrooms as it heats both the space and keep your towel dry. This Victorian style, ball jointed towel rails comes with a beautiful chrome finish but can also be ordered in a range of fabulous finishes including nickel, brass and antique bronze.</p> <p>   </p>	28	<p>Deline</p> <p>The classic design of the Deline is sure to suit any bathroom. With its hidden air vent and brackets mounted on the back of the towel rail it is both stylish and practical.</p> <p>   </p>	48	

		Product		Product	
	<p>Excelsior</p> <p>The contemporary Excelsior has narrow, vertical, flattened oval steel tubes which give a high heat output. The Excelsior has a fast reaction time and heats up your home quickly. The Excelsior range is made to order to fit your requirements.</p> <p>    </p>	52	<p>Metropolitan Spa</p> <p>The Metropolitan Spa towel radiator brings an elegant, spa-like style to any modern bathroom. Connections and air vents are neatly hidden to maintain purity of the design. Smaller sizes ideal for fitting within cloakrooms and en-suites.</p> <p>     </p>	68	
	<p>Fare Tech</p> <p>The Fare Tech electric radiator combines beauty and brains. Manufactured from aluminium, its unique, elegantly curved shape allows comfortable radiant heat to disperse optimally throughout the room.</p> <p>   </p>	54	<p>Nobis</p> <p>The Nobis towel radiator with its elegant patented chrome finish and unique contemporary joints is equally perfect for both traditional and modern bathrooms and is also suitable for installation on hot water systems.</p> <p>   </p>	70	
	<p>Klaro</p> <p>The Klaro is an affordable style, suitable for central heating systems or for use with an immersion heater during summer when the central heating is turned off. Smaller sizes ideal for fitting within cloakrooms and en-suites.</p> <p>     </p>	56	<p>Olga</p> <p>The Olga's stylish mix of round and square tubes makes it a very versatile choice, as it complements a wide variety of bathroom styles. Made from stainless steel it is also a great choice for wet rooms and we have selected a handy range of sizes to suit different installations.</p> <p>     </p>	72	
	<p>Kleo</p> <p>Elegant Kleo single or double tubed horizontal radiators stocked in white and available in Made to Measure options.</p> <p>    </p>	60	<p>Orbit</p> <p>Made of highly polished stainless steel, the Orbit will shine in any bathroom or wet room. Its dynamic design is at once both modern and retro and we have included neat detailing such as adjustable brackets and hidden air vents. The Orbits looping tubes allow plenty of space for towels.</p> <p>    </p>	74	
	<p>Lisset</p> <p>The big sister of our popular Svelte radiator, the Lisset radiator has the same graceful style but with a larger heat output and more space for towels, making it a great choice for family bathrooms. Made from recycled aluminium it's not only eco-friendly but it also heats up faster and more efficiently than traditional designs.</p> <p>   </p>	62	<p>Osbourne</p> <p>The Osbourne is a floor-mounted model offering plenty of space for luxurious towels, it is an equally stylish option for industrial-style homes and loft bathrooms thanks to its antique look. This towel rail is also available in a number of deluxe finishes, from bright nickel to polished brass.</p> <p>     </p>	76	
	<p>Metropolitan</p> <p>The Metropolitan has a contemporary, minimalist appearance. Designed in Italy by the award-winning King & Miranda, the Metropolitan has beautiful clean lines creating a geometric shape. Smaller sizes ideal for fitting under bathroom windows.</p> <p>   </p>	64	<p>Ovida</p> <p>What sets the Ovida apart from the rest is the upmarket tube-on-tube design. Stylish and practical, it has closely spaced tubes which not only make the proportions more elegant but also improve the output of the towel rail.</p> <p>     </p>	78

Ovida Bow

The sister of the Zehnder Ovida, the Ovida bow is a stylish tube-on-tube bowed radiator providing ample space for hanging towels.

Product

82

Roda Spa

The Roda Spa combines practicality and contemporary design and a high heat output that will warm even the largest of bathrooms. Smaller sizes ideal for fitting under bathroom windows.

Product

102

Pera

Less is definitely more with this chic stainless steel towel rail as the refined construction allows the tubes to meld gently into one another. The Pera brings a quiet elegance to both modern and traditional bathrooms.

86

Roda Spa Asym

The Roda Spa Asym is a highly functional and stylish towel rail with a practical asymmetrical design that allows towels to be hung easily. The central heating model is available with horizontal tubes facing either left or right.

104

Quaro Spa

The Quaro Spa has an elegant square profile frame and horizontal heating pipes. Beautifully designed with clarity and simplicity, even the right-angled wall brackets are stylish. Smaller sizes ideal for fitting within cloakrooms and en-suites.

88

Stellar Spa

The Stellar Spa is contemporary in design with its stainless steel finish. Ideal for wetrooms and suitable for dual energy installation. Smaller sizes ideal for fitting under bathroom windows, or within cloakrooms and en-suites.

108

Ribbon

The super sleek and stylish Ribbon towel radiator is suitable for modern bathroom interiors and available in a range of sizes, and in over 50 finishes including chrome, white and matt black.

90

Subway

The Subway is a simple yet elegant towel rail. Stocked in either white, chrome and three other colours as standard. Also available in a variety of colours from the Zehnder colour chart. Smaller sizes ideal for fitting within cloakrooms and en-suites.

110

Roda

A simple, effective and efficient radiator, the Roda is perfect for all living areas, and is also available Made to Measure.

94

Svelte

The prima ballerina of radiators – slender, graceful and versatile – the Svelte looks equally at home in luxury spa bathrooms and contemporary kitchens.

118

Roda Mirror

With a full-length mirror to enhance its elegance, the Roda Mirror radiator is a stylish asset to any home.

98

Vision

Offering simple yet beautiful design, the Vision works seamlessly in en-suites, family bathrooms and cloakrooms alike. With discreet brackets and a stock range of stunning finishes, the Optic will be an eye-catching accompaniment to any popular bathroom style.

120

		Product		Product
	<p>Alban</p> <p>This stainless steel towel warmer looks fabulous in contemporary interiors. Great for wet rooms and family bathrooms alike, the cantilevered rails allow space for the plumpest of towels and the radiator can be installed with the rails to the right or left.</p> <p>     </p>	126	<p>Folio Vertical</p> <p>With an impressive flat surface, full closed edging and gently tapered silhouette – Folio is highly appealing with its unusually light appearance.</p> <p>    </p>	
	<p>Archibald</p> <p>Move over Jeeves. This eye-catching towel radiator was the winner of the international Designboom competition in 2007, where the designer, Leo Salzedo, styled it as a tribute to the ultimate butler. Its sleek, sinuous form will ensure that your towels are served warm and dry.</p> <p>    </p>	130	<p>Folio Belt</p> <p>The stunning Folio Belt can feature one or two chrome-plated towel rails, depending on the height creating a towel radiator out of our popular Folio design.</p> <p>    </p>	
	<p>Arteplano</p> <p>This radiator puts its best face forward, as the heating tubes are concealed behind a beautiful metal front plate. Choose a colour to pop or blend, or take home a true original in brass or copper – each model is individually etched so every radiator is unique.</p> <p>     </p>	134	<p>Folio Glass</p> <p>Whether it's black, white or even in the form of a mirror, the Folio Glass integrates itself harmoniously into its interior environment with its elegant glass finish.</p> <p>  </p>	
	<p>Chime</p> <p>This gleaming towel warmer is a great all-rounder. Made from stainless steel, the polished finish it is perfect for wet rooms, alternatively you can now order the Chime our special PVD finishes. With wide rung spacing also allows plenty of space for towels – great for family bathrooms.</p> <p>      </p>	142	<p>Splash</p> <p>Made from Corian® the Splash is not only a radiator, but also an art piece - creating the perfect focal point for open plan living spaces.</p> <p>  </p>	
	<p>Deseo Verso</p> <p>Stylish and practical, the innovative retractable bars of the Deseo Verso make it not only a towel warmer but a room radiator rolled into one.</p> <p>  </p>	146	<p>Zenia</p> <p>The revolutionary Zehnder Zenia thermal comfort unit supplies pleasant heat quickly and ensures ultimate comfort heating in your bathroom independently of the central heating system. At the same time you can dry and warm towels behind a visually appealing heated glass door.</p> <p>  </p>	
	<p>Flowform</p> <p>The industrial heating element is now a beautiful radiator in its own right. The Flow Form's spiral fin was designed for technical efficiency whilst providing a stylish finish to any living space.</p> <p>    </p>	150	<p>For more information on the Studio Collection visit page 4</p>	

Made to Measure ^(M2M)

Zehnder radiators are very much part of the interior design planning process. Whether manufactured to a special size, angle or curve, our special radiator designs allow for a truly customised heating solution. Radiators no longer need to be hidden. They can set the scene for a room design, adding to the ambience and becoming a central aesthetic element of the interior decor.

To add the perfect radiator to your home

- Select the height you need to fit the space perfectly and to achieve your desired heat output
- Choose the colour, finish and valves to match your interior
- Add your accessories including towel bars and hooks, making your radiator functional as well as stylish

Temperature controller: Backlit LCD digital display screen gives complete control. Temperature can be adjusted in 0.5°C increments. 3 pre-set programmes and 5 mode settings. Open window detection system and parental lock. 7 day programmable function.

Open Window detection

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- Temperature changes are quickly recognised via the external temperature sensor
- The integral thermostat proactively reacts to sensor information; delivering the perfect indoor climate
- Intuitive radiator which automatically switches off if a window is open for an extended period
- An intelligent heating solution which lowers costs and energy consumption

The **Alura**, is a fast response electric aluminium radiator with a high heat output despite its compact size. It is lightweight and easy to install, plus the straightforward digital controls make it easy and economical to use. H shaped mounting brackets with a removable spirit level and locking system are also included.

formerly the
BISQUE BUCKINGHAM

The timeless style of this compact, ball jointed towel rail complements both modern and traditional bathrooms. Made from chromed brass the **Buckingham** can be used on both central heating and hot water systems. It is also available to order in a range of fabulous finishes including bright nickel, polished brass and antique bronze.

Zehnder recommends VALVE SET 8.

Made to Measure

*1/2" air vent
Width excludes air vent
F = flow
R = return
H = height
W = width
Tube: Vertical Ø 25mm
All dimensions in mm

Output and pricing given per section.

Colour finish: Standard colours from the Zehnder colour chart including matt white finish are priced at RAL9016 + 25%. Colour finish and non-stock products delivery: 3-5 weeks.

There are other sizes available on request. Angled and curved radiators are also available.

All prices exclude VAT.

Technical Information

Please note: We only supply complete radiators. Additional sections cannot be joined to our stock range of radiators. The number of sections/length is virtually unlimited. Practicality regarding weights, handling and accessibility should be taken into consideration. Large radiators may be supplied in modules to be assembled on site. Lead times – Please allow 6-8 weeks for curved, angled and engineered to drawing.

Prices are for radiators with standard bottom opposite end connections. For underside connections add £15 per radiator.

Angled and curved radiators are also available.

Angled radiators: Prices on application. Please contact your Zehnder stockist or a member of our sales team for further details.

Curved radiators: Please multiply the prices for standard radiators by 2.

The **Zehnder Charleston** multi-column can be Made to Measure, with bespoke angles and curves.

Charleston curved on welded feet
Deliveries vary for curved or angled radiators. Please allow at least 8 weeks for delivery. They are also priced on application.

Zehnder recommends **VALVE-SET-37**.
For more information see page 182.

formerly the
BISQUE DELINE

It's the considered details which make the **Deline** stand out from the crowd – discreet brackets, hidden air vents and a stock range of seven fabulous finishes which complement popular bathroom surfaces.

Zehnder recommends VALVE SET 28.

Discreet Airvent on the rear of the collector

For models in volcanic and matt black finish, manual valves sets 26, 27 & 28 are now available in a complementary finish.

The complete  compliant technical specifications can be viewed by scanning here.

887220	Zehnder Connect hub for Fare Tech radiator. White (RAL 9016)	£256	£307.20

Open Window detection

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- Temperature changes are quickly recognised via the external temperature sensor.
- The integral thermostat proactively reacts to sensor information; delivering the perfect indoor climate.
- Intuitive radiator which automatically switches off if a window is open for an extended period.
- An intelligent heating solution which lowers costs and energy consumption.

H = height
W = width
All dimensions in mm

The Zehnder Fare Tech can now be controlled via the Zehnder Connect App. Scan the QR code on the following page to find out more.

The **Fare Tech** electric radiator combines beauty and brains. Manufactured from aluminium, its unique, elegantly curved shape allows comfortable radiant heat to disperse optimally throughout the room, whilst its smart integrated control panel allows the room temperature to be easily set and energy consumption controlled.

Temperature Controller. For more information please scan the QR code on the right.

The complete CE compliant technical specifications can be viewed by scanning here.

Model		Finish	RRP (ex VAT)	RRP (inc 20% VAT)
LRS-040	Zehnder Lissett Towel Rail for cloakroom. Length spans 2 elements (adds 45mm to front face)	Polished Aluminium	£194	£232.80
LR-040	Zehnder Lissett Towel Rail. Length spans 2 elements (adds 65mm to front face)	Polished Aluminium	£197	£236.40

Please note: additional towel rails are only suitable for radiators which are 401mm in width.

*1/2" air vent
Width excludes air vent
F = flow
R = return
H = height
W = width
All dimensions in mm

formerly the
BISQUE LISSETT

The big sister of our popular Svelte, the **Lissett** has the same graceful style but with a larger heat output and more space for towels, making it a great choice for family bathrooms. The rail is made from highly polished aluminium and allows plenty of space for sumptuous towels.

Also available in smaller sizes, ideal for cloakrooms and ensembles

For pipes from the floor
Zehnder recommends VALVE SET 36.

For pipes from the wall
Zehnder recommends VALVE SET 11.

LI-160-040 TRAFFIC WHITE 9016
with optional towel rail LR-040

*White (RAL 9016)

Colour finish: Standard colours from the Zehnder colour chart including matt white finish are priced at: RAL 9016 + 25%.
Colour finish and non-stock products delivery: 3-5 weeks.

H = height
W = width
Tube: Horizontal Ø25mm
Tube: Vertical Ø26mm
Immersion heater: 30mm
All dimensions in mm

With stunning horizontally arranged round tubes, the Zehnder **Ovida Bow Electric** is a fast reacting, modern addition to any bathroom or kitchen. Available in a variety of colours and sizes, the Ovida Bow Electric benefits from large spacing between the tubes providing plenty of hanging towel hanging space - perfect for the family bathroom.

Electric models

Electric models supplied as standard with non-adjustable thermostat in white or chrome finish to match rail. (Colour rails supplied with chrome thermostat).

Cable Cover SHEC

(optional extra) This neat chrome cover hides the cable attached to the heater.

ROEHD

ROEV

Open Window detection

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- Temperature changes are quickly recognised via the external temperature sensor.
- The integral thermostat proactively reacts to sensor information; delivering the perfect indoor climate.
- Intuitive radiator which automatically switches off if a window is open for an extended period.
- An intelligent heating solution which lowers costs and energy consumption.

H = height
W = width
All dimensions in mm

The Electric **Roda** range of efficient decorative radiators, are available in horizontal or vertical versions, perfect for all living areas.

Open Window detection

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- External temperature sensor recognises temperature changes.
- Integral thermostat reacts to sensor information
- Radiator automatically switches off if a window is open for an extended period.
- Intelligent heating that saves energy and costs.

The simple elegance of the **Subway Electric** is maintained with either a simple immersion heater or a radio frequency remote programmer. Also available in stainless steel see page 116.

Where space is restricted the Zehnder Subway Electric is available with a room divider bracket option. To order this version please stipulate on your purchase order at the time of ordering.

The aluminium honeycomb structure, with its meandering copper pipe, is filled with graphite, enabling heat to be distributed throughout the entire front of the radiator quickly and evenly. Suitable for all low temperature systems, heat pumps, condensing boilers, open or closed heating systems.

Zehnder recommends VALVE-SET-11-CR.
For more information see page 182.

The **Vitalo Bar** has an incredibly slim 16mm profile and is manufactured from corrosion-resistant, high-grade materials.

Designed by renowned designers King & Miranda, the Vitalo Bar is economical and quick to heat up, making it extremely economical.

HEATED TOWEL RAILS FOR BATHROOMS

Zehnder **Alban**

The rectangular version of our popular Chime has the same sparkling appeal but with a perpendicular style. Cantilevered rails allow for even the plumpest towels to be easily slid on and off. Great for family bathrooms, the Alban can be installed with the rails to the left or right.

Zehnder Alban

Formerly the Bisque Alban

GENERAL PURPOSE RADIATORS

Zehnder
Arteplano

This radiator puts its best face forward, as the heating tubes are concealed behind a beautiful metal front plate. Choose a colour to pop or blend, or take home a true original in brass or copper – each model is individually etched so every radiator is unique.

Zehnder Arteplano

Formerly the Bisque Arteplano

Zehnder recommends
valve set 11-CR.
see page 182.

The aluminium honeycomb structure, with its meandering copper pipe, is filled with graphite, enabling heat to be distributed throughout the entire front of the radiator quickly and evenly. Suitable for all low temperature systems, heat pumps, condensing boilers, open or closed heating systems.

It's all in the detail...

- prices inclusive of VAT are shown in pink
- available as both a central heating and electric radiator
- 5-6 week delivery lead time
- projection from the wall to front face: 85mm
- electric version controlled via radio frequency remote programmer
- IPX4 rated

Designed by King & Miranda

The complete  compliant technical specifications can be viewed by scanning here.

ELECTRIC RADIATORS

Zehnder **Splash**

Make a Splash with this stunning new decorative radiator. Made from Dupont Corian, the Zehnder Splash is an art piece and radiator rolled into one.

Zehnder Splash

SPZE-120-075/GF

height: 1230 mm

length: 750 mm

output: **750 watts**

+ VAT

white: £3,163 £3,795.60

The innovative Zehnder Splash decorative radiator comprises of a aesthetically pleasing Corian® front and a supporting structure in expanded natural graphite. The electrically operated heating elements embedded in the graphite layer ensure fast and uniform heat distribution heating up quickly on those cold winter's days. With the ability to install this either vertically or horizontally, the Splash is sure to create a statement in any room.

It's all in the detail...

- prices inclusive of VAT are shown in green
- can be positioned horizontally, or vertically
- projection from the the wall: 90mm
- made from durable Corian
- controlled via radio frequency programmer
- electric operation providing fast heat response time

The complete  compliant technical specifications can be viewed by scanning here.

Zehnder **Zenia**

The Zehnder Zenia is an electric towel warmer, towel dryer, infrared radiator and boost heater all-in-one – in the form of an integrated unit that perfectly blends into modern bathroom architecture thanks to its minimalist design.

Ventilation Extractor fans

Did you know that a shower can create up to two pints of moisture? Add this to boiling the kettle, cooking, drying clothes and breathing and there is a lot of moisture in your home, not to mention other airborne particles such as dust and Volatile Organic Chemicals!

Ventilation is crucial to every home, especially in bathrooms and kitchens.

Our range of fans offer high performance extraction, decorative or discreet styling and low noise options - all that you need from your bathroom fan.

Zehnder Low Energy Continuous Fan Ø100mm

Continuous ventilation ensures a continually fresh environment with a constant low level trickle. The automated boost fan mode will come on if there is a high level of moisture in the room.

This low-noise, low-energy design costs as little as £1.50 to run for the entire year. It operates discreetly in the background, ensuring mould and condensation are kept at bay. SMART humidity and timer controls eliminate nuisance noise and running, leaving you to relax in the serenity of your bathroom.

100% adjustable speed

Ceiling Application (unit can be wall or ceiling mounted)

ZCV2 Controls

VENTILATION - EXTRACTOR FANS

	ZGG42WA	100mm External grille with spigot in white	£5	£6.00
	ZGG42BA	100mm External grille with spigot in brown	£5	£6.00

Zehnder Adaptive fan with "SMART" timer technology.

The length of time of the fan over-run is based on occupancy duration, up to a maximum run-time of 15 minutes, reducing heat loss and energy usage.

Zehnder Adaptive fan with "SMART" humidistat and timer technology.

The fan knows the normal humidity level and only activates when spikes occur, providing the right amount of ventilation when required, unlike fans with a generic point that respond to high ambient humidity on a summer's day and particularly in the middle of the night.

Zehnder Silent Wall & Ceiling Fans

In stock items highlighted in black	Description	Controls	Airflow I/s in FREE AIR (BS848 Pt 1)	Sound pressure level @ 3m dB(A)	Energy consumption (W)	IP Rating	RRP (ex VAT)	RRP (inc 20% VAT)

Colours and special finishes

The majority of our radiators are available from stock in at least 2-3 finishes, which we believe will complement most interiors. However, there are a wide range of other options available to order.

Our most popular colours and finishes are shown on the following pages. To see which radiators are available in different colours and finishes please consult the tables on the following pages. If your preferred finish is not shown, we can arrange for some radiator models to be painted in a wide range of RAL or NCS colours (**price available on application**). This is only possible for ranges which show a ♦ in the colours column on the tables.

Colour matching service

We offer a unique colour matching service which allows you to match your radiators to popular paint ranges such as Farrow & Ball, Little Greene and Dulux. We can also match to other items such as wallpapers and kitchen cabinets. Please see the video on our website for inspiration.

All we require is a sample of the colour you want and we can then advise the closest match. There will be a small charge (< £10) to organise each proof but you can then be happy you have the precise colour.

Please see the tables on page 186 to see which radiator ranges can be colour matched. Prices are available on application as it varies depending on product and colour. Contact a member of our sales team for prices and lead times.

* Please note: colour matching is only available on products that are stocked in white.

Exceptional finishes

For our Zehnder Charleston range, we have developed some especially striking special finishes, which are hand applied with minute care. Please contact us for samples and prices.

Our organic rustique finish is not simply a paint effect but is achieved by means of genuine oxidation. Iron metal is sprayed over a base coat after which a water solution is applied to produce the rust patina. This means that every radiator will be bespoke with a unique pattern.

The gorgeous rose copper finish contains genuine copper but is overlaid with a matt lacquer which prevents further tarnishing, whilst still maintaining the beautiful glow.

Please visit zehnder-radiators.co.uk to see our special finish prices or contact a member of our sales team.

Below are our are striking two-tone Iridescent colours
left to right: oyster, gold to silver, red to gold, purple to green and green to silver.

Zehnder Charleston in Technoline (Clear)

This ever popular and exciting finish exposes the manufacturing marks that occur in the production of the radiator. Part of this industrial appeal is the lack of uniformity and regularity, as each model will be slightly different and therefore unique.

However, it is possible to identify some common effects, depending on the width or height of the radiator, due to the different manufacturing techniques used.

When considering stock sizes of the Zehnder Charleston it is helpful to note the following;

Our floor mounted Charleston is 4 columns wide. Models stocked in the Technoline (Clear) finish are over 475mm high and will typically look as shown below. Note that the top of the radiator is quite uniform and light in colour.

For sizes outside of the stock range the following variations should be considered.

The manufacturing of the 3 column Charleston, equal or over 400mm in height, has now changed and the finish will look similar to that of the 4-column model.

For radiators under 400mm in height (excl feet), the column will have a strong appearance with darker welding marks near the top and bottom. Those equal or over 400mm in height (excl feet) will have a much lighter, more uniform appearance.

Whilst the above should help to give a guide to some of the varieties in finish, we would advise that other differences could occur and that the beauty of this product is in its unique, industrial appearance. Please note: the finish is not suitable for Bathrooms

World of Colours

The new Zehnder colour system gives customers every option to perfectly coordinate the colour of their radiators with the latest interior design trends, seamlessly integrating them into any environment.

Please note: due to the limitations of the printing process, the colours shown here are not exact representations. If you wish to order a radiator in one of these colours, please ask to see our separate colour chart or ask for a sample before placing your order (samples can be ordered via our website).

Finishes exclusive to aluminium radiators

EXPLANATION

◆ These colours are finished with a gloss finish; all other colours are matt-finished.

Some colours and finishes are only available for selected products. RAL-codes are descriptions of manufacturer. Special colour shades on request.

Despite extreme care in the production of this colour chart as well as in the painting process of our radiators, slight colour deviations, depending on the production series and compared to other colour carriers (ceramic, paper, metal ...) possible.

General Information

Heat Loss Calculator

This easy-to-use heat calculator can work out the heat requirements for your room.

Stage 1 Take the room dimensions in metres

Width m Length m Height m

calculate the volume ($W \times L \times H$) = cubic metres

Stage 2 Heating requirements per room type

Living Room / Dining Room / Bathroom volume

multiply volume as calculated in Stage 1 by 50 = Watts required

Bedroom volume

multiply volume as calculated in Stage 1 by 40 = Watts required

Kitchen / Hallway volume

multiply volume as calculated in Stage 1 by 30 = Watts required

Stage 3 Other factors for consideration

Is the property exposed? a

Does the room have large areas of glazing? b

Are the windows double glazed? c

If factor 'a' applies, increase the Watts required at Stage 2 by 15%

If factor 'b' applies, increase the Watts required at Stage 2 by 20%

If factor 'c' applies, decrease the Watts required at Stage 2 by 10%

If factor 'a' and 'b' apply, increase the Watts required at Stage 2 by 35%

If factor 'a' and 'c' apply, increase the Watts required at Stage 2 by 5%

If factor 'b' and 'c' apply, increase the Watts required at Stage 2 by 10%

If factor 'a', 'b' and 'c' apply, increase the Watts required at Stage 2 by 25%

Please note that this calculator is provided as a guide only.

To convert Watts to BTUs, multiply by 3.412.

For an approximate conversion from $\Delta T50^{\circ}\text{C}$ to $\Delta T60^{\circ}\text{C}$, multiply the $\Delta T50^{\circ}\text{C}$ output by 1.2.

Terms and Conditions of Trading

A complete copy of the company's terms and conditions of trading are available on our website www.zehnder.co.uk

In addition to the Terms and Conditions, please note the following:

- All delivery times quoted are estimates only. Prices quoted include free delivery to the UK mainland for radiators and towel rails. Orders for valves, fans, elements and accessories with a net order value under £100 are subject to a processing charge of £10 + VAT
- Returned goods for credit will only be accepted by prior arrangement (confirmed in writing), within 8 weeks of the date of despatch, where the goods are part of our stock range and where the goods are as fit for sale on their return as they were on delivery. If goods have been fitted this is deemed as acceptance of their quality. We cannot accept the return of non-stock goods.
- Damaged products are to be reported to us within 3 days of delivery. Zehnder cannot be held responsible for any damage after onward delivery. Faulty products are to be reported to us as soon as possible. If the items have been installed, you are in acceptance of it's condition and Zehnder reserve the right to refuse credit.
- You are responsible for ensuring the suitability, conformity and interoperability of the goods or indicative system design suggestions provided by us with your heating system and your design requirements. It is important that you undertake such verification with an appropriately qualified expert third party
- Where a radiator is returned as no longer required and an alternative radiator is not ordered a 25% restocking fee plus a £10 administration fee will be charged (unless the goods were defective when delivered). If a radiator is no longer required but an alternative radiator is ordered, either a restocking fee of £25 or 25% of the value (whichever is the lower) will be charged, but the administration fee will be waived.
- We warrant the goods for a period of 5 years for steel radiators, 10 years for stainless steel and aluminium radiators, 2 years for radiator electrical componentry and 3 years for extractor fans, from the date of delivery. The warranty is subject to correct installation to current standards/water treatments and use.
- Radiators with steel components (other than stainless steel) must not be installed on a domestic hot water circuit. If a stainless steel or brass product is to be installed on the domestic hot water circuit, a check should be made with the local water authority to ensure that dezincification is not a common occurrence.
- Artificially softened water should not be used to fill radiators. For FAQ radiator/water-related information, visit www.fernox.com.
- All measurements given in this brochure are nominal dimensions only.
- All brochures, catalogues and other promotional materials are to be treated as illustrative only. Their contents form no part of any contract between us and you should not rely on them in entering into any contract with us. Any typographical, clerical or other error or omission in any literature, quotation, price list, or other document issued by us will be subject to correction without liability being incurred by us.
- Orders for non-stock items such as made to measure and made to order (as identified as such in our brochure for Zehnder which was in circulation at the date you placed the relevant order) which we have accepted cannot be varied and/or cancelled once manufacturing has begun or special material and/or equipment has been ordered by us. Any variation with the order has to be communicated within 24 hours of the order acceptance.
- All VAT calculated at 20%

Bathroom Zones

The diagram below shows a bathroom divided into four clear zones: 0, 1, 2 and outside zones. Please note, the diagram is only a guide and is NOT to scale. Please refer to I.E.E Wiring Regulations (BS 7671:2008) for detailed information.

Zone 0: Inside the bath

Zone 1: Area above bath / shower tray to a height of 2.25m.

Minimum rating of IPX4 should be used unless water spray will be present. In this case, a rating of IPX5 should be used.

Zone 2: Area stretching 0.6m from zone 1. Minimum rating of IPX4 should be used here.

Outside Zones: No water spray is likely to be used here, therefore, no IP rating is required.

IP Rating: "X" denotes level security against dust particles. Second digit denotes level of "watertightness".

IPX5: Protected against low pressure water jets

IPX4: Protected against splashing water

Frequently Asked Questions

Why is it important with some of the models that the flow is in a specific connection position?

Some of the design radiators have baffles inside the water-carrying tubes to divert the water flow around the whole radiator to maximize efficiency. Check the installation instructions to see if this applies to the radiator before it is installed.

What is an inhibitor and why should it be used in a central heating system?

An inhibitor is a chemical mix that should be added to the central heating system water to prevent corrosion and to prolong the life of the system. When new or additional radiators are being installed, the system should be drained, cleaned and flushed in accordance with BS7593 and a good quality chemical water treatment inhibitor should be added to the heating system.

Can steel and aluminium radiators be put on the same system?

Yes, as long as an inhibitor for mixed metal systems is used. In reality, most systems are already mixed metal, as many have aluminium heat exchangers in the boiler, plus copper pipes and steel radiators already installed.

Why is it important to use dual energy installations correctly?

Simultaneous use of the electrical element and the central heating system should be avoided as this will shorten the life of the element and invalidate the warranty. Correct use is as follows: In summer when the central heating is switched off, vent the radiator to ensure there is no air present, then close the flow valve (only) and activate the immersion heater. In winter, de-activate the immersion heater and open the flow valve.

What is the difference between outputs listed at $\Delta T60^{\circ}\text{C}$ and $\Delta T50^{\circ}\text{C}$?

$\Delta T60^{\circ}\text{C}$ allows for older boiler systems, whilst $\Delta T50^{\circ}\text{C}$ is the new European testing standard for modern boilers, such as condensing boilers, which have lower flow and return temperatures. Therefore, to avoid radiators being incorrectly sized, it is important to know the system's temperatures and take them into consideration.

A World of Colour

2022 sees the introduction of a brand new Zehnder Colour chart. Choosing and ordering a product in one or more of these exciting new colours couldn't be easier.

How do I select a gloss or matt finish for my radiator?

All gloss products are indicated in this colour chart with the following icon: 

For example, if you choose to place an order which is Jet Black, this has a gloss finish as identified by the icon below.

Jet Black 
RAL 9005 / 9005 Gloss

To select a colour with a matt finish, simply locate a product that does not include the above icon and place the order using the final code. For example, to order your favourite radiator in Reseda Green in Matt, simply use the code 6211 as below.

Reseda Green
RAL 6011 / 6211 Matt

Can I order a product in gloss if it doesn't have the diamond symbol?

Yes, this is possible, however as this is a finish outside of the Zehnder colour chart an RRP surcharge (in addition to the coloured price) of £330 (excluding VAT) is applied. You will also need to highlight the request for gloss when placing your order.

What does the RAL code mean on the colour chart?

This code can be used to identify the exact colour of the paint used, making it easy to complement the colour of your radiator to other elements in the room.

Are there additional costs for colours from the Zehnder Colour chart?

All colours in their standard finishes featured in the Zehnder colour chart incur a 25% surcharge.

Can I have radiator made in a colour that is not in the Zehnder Colour Chart?

Colours (in the RAL and NCS colour ranges) and/or finishes which are not included in the Zehnder colour chart incur a RRP surcharge (in addition to the coloured price) of £330 (excluding VAT).

Colour matching service

We are pleased to continue our colour matching service on a selected range of products. Details of which products are part of our colour matching service can be found on each individual product page. As with all colour matching services, every colour is unique meaning prices are only available on application.

Zehnder Blok, Zehnder Svelte & Zehnder Lissett in Champagne

Please note, both the Zehnder Blok, Zehnder Lissett & Zehnder Svelte ordered in Champagne (SAP10020) will differ in finish to the Champagne (0258) offered in the Zehnder Colour chart. Please contact us prior to placing an order for these products in a Champagne 0258 finish as this will be priced on application.
