

# Supergen 72TX

Contract Shower Pump

## Description

**Application : Suitable for boosting bathrooms, showers and wetrooms in domestic and commercial settings.**

Cost effective, centrifugal shower pump with twin impeller and brush motor. This pump is a contract pump so has a medium noise level.

Supplied with anti-vibration rubber feet and stainless steel braided hoses. Fitted with long life seals and easy clean filters. Flexible hoses are supplied as standard with 22mm connections. Installation of a surrey flange is recommended for maximum shower pump efficiency.

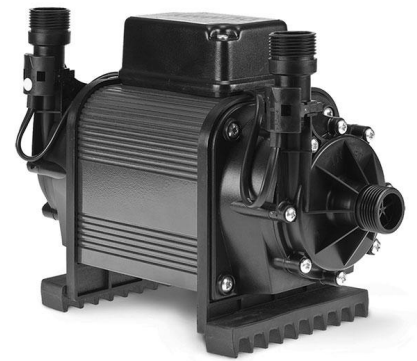

The pump is suitable for use in the following applications:

- One shower with a standard shower head (up to 5" / 127 mm).
- Two showers or a basic bathroom suite with a standard shower head (up to 5" / 127mm).
- Single shower mixer valve with a multifunction shower head.

The Supergen range is not suitable for use with pressurised cylinders, combination boilers or for connecting directly to the mains supply.

The Supergen model below is suitable for positive twin head, gravity fed applications. The pump is fitted with two flow switches that require 0.5 lpm to activate it. If this minimum flow is not available, the Supergen Universal models are recommended.

For sizing advice, please contact our office for assistance.
